**MY_PORTFOLIO**

## OBJECTIVE

Software developer interested in web development data science and cyber security.

## Language

Arabic(native)          English(B1)          French(A1)

## SKILLS

### Technical Skills

| | | |
|---|---|---|
| HTML | Data Analysis | Command line |
| CSS | Pandas | Git and GitHub |
| JavaScript | NumPy | Data structure |
| Python | Matplotlib | Algorithms |
| SQL | Machine Learning | UX |
| Flask | Deep learning | OS |
| Django | Data Science | Networks |
| MongoDB | TensorFlow | Cyber security |
| jQuery | pytorch | Probability |
| bootstrap | NLP | Mathematics |
| | nltk | |
| | spacy | |

### Soft Skills

Teamwork

Leadership

## EDUCATION

**3rd year Bachelor of Computer Science & Mathematics**, Helwan University          2021 – present

## EXPERIENCE

**Helwan university**
I am a student in Helwan university, and I made some experience in AI machine learning and NLP.

**FreeCodeCamp**
**I took many certifications in data analysis and responsive web design and python.**
**See_all_certfication**

# PROJECTS

- **Tytopya project:** text summarization project and chatbot development includes login and data base management with TensorFlow and pytorch for models html CSS JS and bootstrap for UI and flask for backend **(see repo)**

- **Skills app:** simple app to understanding flask SQL alchemy and login manger. (see repo)

- **Add notes:** simple app to understanding flask SQL alchemy and login manger with blueprint module. (see repo)

- **Insurance app:** regression project to predict the cost of insurance depend on features. (see video demo)

- **To do list:** add your tasks using DOM and local storge. (see repo) (demo)

- **Booking system:** this app allows you to register data and use CRUD operations using tkinter and SQLite in python. (see repo)

- **Tic tac:** play tic tac game with your friend using JavaScript. (see repo) (demo)

- **Product management system:** you can put your products with sale tax and counts and make CRUDS operations using local storge and JavaScript. (see repo) (demo)

- **House pricing:** regression project predicts the cost of houses. (see repo)

- **Heart disease:** classification project predicts if the person has heart disease. (see repo)

- **Demographics data analysis:** answers some questions about the data. (see repo)

- **Image editor:** images filter using JavaScript and FileReader class. (see repo) (demo)

- **Bondi template:** bootstrap design. (see repo) (demo)

- **Responsive dashboard:** contains responsive nav and tables using html and CSS. (see repo) (demo)

- **Product page:** responsive product page. (see repo) (demo)

- **Elzero template:** template using html and CSS contains animation. (see repo) (demo)
